I am writing to apply for the Junior Digital Marketing Manager position at Cyrus Digital GmbH. Your focus on training junior talent from the ground up in performance marketing for D2C brands is exactly the kind of structured development environment I am looking for.

Although my professional background is in software engineering, I bring a strong analytical mindset and a deep comfort with data. In my previous roles as a Web Developer, I worked extensively with databases, optimized system performance, and used data to drive technical decisions. I am confident these skills will translate well into campaign analysis and optimization.

What stands out to me is Cyrus Digital's commitment to building expertise through direct mentorship. I am a hard worker and a quick learner, and I am ready to take full advantage of your internal training to develop into a skilled Performance Marketer. I am eager to start with campaign setup and gradually take on full account responsibility.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also willing to relocate to Munich.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
