I am writing to apply for the Performance Marketing Manager position at altitude. Your focus on combining strategic growth with AI-enabled workflows and cross-functional collaboration is exactly the kind of environment where I can contribute effectively.

My background is in software engineering and AI, where I have spent over four years building data-driven systems and automating complex processes. I have worked extensively with AI tools including OpenAI and Replicate to build intelligent assistants, automate reporting, and generate actionable insights from data. This experience directly supports your need for someone who can use AI tools like ChatGPT and Claude to make analyses, research, and campaign concepts more efficient.

One area that particularly interests me is the intersection of data analysis and strategic decision-making. In my projects, I have built systems that track performance metrics, generate real-time reports, and automate workflows. For example, I developed an AI-powered financial platform that processes user data, generates PDF reports, and sends automated communications, all while maintaining clear KPI tracking and performance monitoring. This analytical and structured approach aligns well with your need for KPI-based campaign steering and reporting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and AI-driven approach can contribute to altitude’s growth strategies.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
