I am writing to apply for the Product Owner Marketplace position at cigus GmbH. The opportunity to shape marketplace strategy and drive e-commerce innovation for an international rollout aligns directly with my background in building scalable, customer-facing digital platforms.

Through my professional experience as a Web Developer, I have spent over four years designing and delivering complex software products. One area that particularly interests me is the intersection of marketplace strategy, e-commerce features, and technical execution. I have built a full-stack multi-vendor e-commerce ecosystem that connects customers, sellers, and logistics teams within a unified platform. This involved defining user journeys, integrating external services, and ensuring data security and regulatory compliance.

A relevant example is the multi-vendor e-commerce platform I developed using Laravel and MySQL, paired with Flutter-based mobile applications for different user roles. I was responsible for the entire product lifecycle, from feature prioritization and API design to deployment and performance optimization. I collaborated closely with UI/UX designers and technical stakeholders to deliver a seamless marketplace experience. This experience gave me practical knowledge of e-commerce trends, SEO, and conversion optimization.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to the success of your marketplace platform.

Sincerely,

Md Shahanur Islam Shagor
