I am writing to apply for the Praktikum Online Marketing position at Cyrus Digital GmbH. Your focus on training junior talent in performance marketing within a structured, hands-on environment is exactly the kind of opportunity I am looking for as I build my career in this field.

Although my professional background is in software engineering, I have developed strong analytical and optimization skills through my work. In my previous roles, I regularly worked with data, tracked system performance, and iteratively improved outcomes based on measurable results. This experience has given me a solid foundation for working with campaign metrics and performance data.

One area that particularly interests me is the step-by-step approach your team uses to develop account responsibility. I am someone who learns best by doing, and I am ready to start with campaign setup and optimization, gradually taking on more ownership as I build competence. I am comfortable with numbers and enjoy the process of testing, measuring, and refining.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in Voronezh and am prepared to relocate to Munich for this role. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
