I am writing to apply for the Senior Designer - Brand and Web position at OKTOPODS Agency GmbH. Your focus on combining brand thinking with digital experiences and AI-supported workflows aligns with the kind of work I enjoy doing.

Through my professional experience as a Web Developer, I have built websites and digital interfaces where design quality and usability were equally important. I have worked with Figma, Tailwind CSS, and modern frontend frameworks to create responsive, visually consistent layouts. Typography, hierarchy, and attention to detail are aspects I prioritize in every project.

One area that particularly interests me is how design systems create consistency across brand touchpoints. In previous work, I developed full-stack applications where I translated strategic requirements into clean, functional interfaces. I collaborated with stakeholders to ensure the visual direction matched business goals while maintaining a high level of executional craft.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my design and development experience could contribute to the projects at OKTOPODS.

Sincerely,

Md Shahanur Islam Shagor
