I am writing to apply for the Account Executive - DACH role at Apaleo. Your API-first property management platform represents the kind of modern, modular infrastructure that the hospitality industry needs, and I am interested in contributing to your growth in the DACH region.

Although my professional background is in software engineering, I have spent years working directly with stakeholders, understanding their operational needs, and communicating technical solutions clearly to non-technical decision-makers. At Explo-IT, I collaborated closely with clients and internal teams to deliver web applications, which required me to navigate complex requirements, manage expectations, and ensure successful adoption. This experience has given me a practical understanding of how to build trust and drive outcomes in a consultative environment.

I am fluent in English and have working knowledge of German, with a clear plan to reach full professional fluency for the DACH market. I am comfortable with ownership and self-directed work, and I am drawn to Apaleo's emphasis on autonomy and results. I am genuinely curious about hospitality technology and eager to learn the industry deeply.

In addition to my technical and communication experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in stakeholder engagement and my drive to master the DACH market can contribute to Apaleo's success.

Sincerely,

Md Shahanur Islam Shagor
