I am writing to apply for the Commercial Operations Manager role at Noah Labs. Your work on improving cardiovascular care through telemonitoring and voice-based biomarkers is genuinely interesting. The combination of health technology, research partnerships with Charitˆ' and Mayo Clinic, and a mission to extend healthy life for heart patients makes this a compelling opportunity.

Through my experience building and maintaining digital systems, I have developed a structured approach to managing tools, data, and workflows. I am comfortable working with CRM platforms, setting up automations, creating reports and dashboards, and ensuring that internal processes run smoothly. I enjoy optimizing systems so that teams can focus on their core work without friction.

One area that particularly interests me is process improvement. In previous projects, I have documented workflows, identified bottlenecks, and implemented changes that made operations more efficient. I bring the same mindset to this role: looking for ways to streamline, automate, and improve how things work behind the scenes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can support your sales and operations teams at Noah Labs.

Sincerely,

Md Shahanur Islam Shagor
