I am writing to apply for the Vertriebsmitarbeiter:in position at Daniel Jankowski. Although my professional background is in software engineering, I have developed transferable skills in communication, client management, and independent ownership that align well with the responsibilities of this role.

Through my work as a full-stack and AI engineer, I have collaborated directly with clients and stakeholders to understand their needs, translate requirements into actionable plans, and deliver solutions on schedule. This experience has taught me how to build trust, communicate clearly, and manage expectations effectively.

One area that particularly interests me is the emphasis on Eigenverantwortung and long-term customer relationships at TELIS FINANZ. In my previous roles, I consistently took ownership of projects from concept to deployment, ensuring that every detail was handled responsibly. I am confident this same mindset will allow me to succeed in client acquisition and account management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am ready to bring my discipline, adaptability, and focus on results to your team. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to Daniel Jankowski.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
