I am writing to apply for the (Senior) Product Manager Growth position at 1KOMMA5°. Your mission to build the energy system of the future with Heartbeat AI and transition 1.5 million households to renewable energy by 2030 is ambitious and meaningful. The idea of integrating solar, batteries, heat pumps, and e-mobility into an intelligent, automated virtual power plant is exactly the kind of real-world systems challenge that drives my work.

My professional experience as a software engineer has given me a strong foundation in building consumer-facing digital products, automating workflows, and making data-driven decisions. Over the past four years, I have designed and developed full-stack web applications using Laravel, Next.js, React, and Node.js, with a focus on performance, scalability, and user experience. I have also integrated AI-powered features, payment systems, and real-time communication tools into production applications.

One area that particularly interests me is reducing manual effort through smarter automation and AI-powered workflows. In a recent project, I built an AI-powered financial platform that used OpenAI assistants, AWS Transcribe for voice-to-text conversion, and automated PDF term sheet generation. This system replaced several manual processes and improved the speed of document delivery. I also developed a real-time server health monitoring dashboard that streams live metrics using Socket.IO, demonstrating my ability to build tools that provide immediate visibility and reduce operational overhead.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my experience in building automation, AI-driven tools, and scalable systems can contribute to 1KOMMA5°s growth and product roadmap.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
