I am writing to apply for the Senior Sales Engineer MedTech position at ANGEHEUERT GmbH. Your client's work in developing high-precision mechatronic solutions for leading medical technology companies is impressive, and I am interested in contributing to the strategic growth of their MedTech business.

My professional experience as a software engineer has given me a strong technical foundation that is directly relevant to this role. I have designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication systems and secure payment gateways. This hands-on work with complex systems has developed my ability to understand technical requirements and translate them into practical solutions.

One area that particularly interests me is the combination of technical understanding with strategic business development. In my previous role, I collaborated closely with stakeholders and engineering teammates to deliver product features, optimize application performance, and ensure smooth deployment on Linux servers. This experience has prepared me to work effectively at the intersection of technology and business, supporting customer development and new market opportunities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and problem-solving approach can contribute to your client's continued success in the MedTech market.

Sincerely,

Md Shahanur Islam Shagor
