I am writing to apply for the (Senior) IT Operations Engineer position at MILES Mobility. Your focus on building and securing internal infrastructure while scaling identity management and security posture aligns with my experience in systems engineering and infrastructure management.

MILES Mobility's mission to provide flexible urban mobility through a modern car-sharing platform is genuinely interesting. The complexity of keeping a distributed ecosystem running smoothly across vehicles, users, and internal teams presents the kind of infrastructure challenge I find most engaging.

Through my professional experience, I have worked extensively with Linux server administration, Docker containerization, and Nginx and Apache web servers. I have deployed and maintained production applications using CI/CD pipelines and managed cloud infrastructure on AWS and Google Cloud. I have also worked with Kubernetes for container orchestration and used Prometheus and Grafana for monitoring system health and performance.

One area that particularly interests me is security and compliance. In my previous work, I implemented authentication systems, role-based access control, and secure payment integrations. I have experience with JWT-based authentication and understand the importance of maintaining secure configurations and documentation. I am comfortable troubleshooting complex software issues and working with external vendors to integrate third-party services.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my infrastructure and security experience can contribute to MILES Mobility's IT Operations team. I have attached my CV for your review and welcome the opportunity to discuss how I can support your internal systems and security posture.

Sincerely,

Md Shahanur Islam Shagor
