I am writing to apply for the Key Account Manager / Technischer Vertrieb / B2B Sales position at Lucius & Baer GmbH. Your company's focus on visualization and control systems for industrial, medical, and rugged applications, combined with the GuS-Gruppe's specialization in transparent protection for the defense industry, presents an interesting intersection of hardware and software that aligns with my technical background.

Through my professional experience as a software engineer, I have developed strong technical understanding of embedded systems, Linux-based environments, and system-level integration. I have worked extensively with Docker, Nginx, Apache, and cloud platforms including AWS and Google Cloud, which allows me to understand and communicate the technical value of complex products like displays, camera systems, and embedded solutions to B2B clients.

One area that particularly interests me is the technical consulting and solution-selling aspect of this role. In my previous work at Explo-IT and DataSoft LTD, I collaborated closely with engineering teams, product managers, and stakeholders to deliver custom system solutions. I am comfortable managing the full cycle from initial client consultation through to delivery, and I understand how to translate technical requirements into practical, customer-specific solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical background and client-facing experience can contribute to your team at Lucius & Baer GmbH.

Sincerely,

Md Shahanur Islam Shagor
