I am writing to apply for the Business Development & Sales Manager:in position at easy recycle GmbH. Your mission to digitize recycling in the construction industry and reduce waste through a connected platform is a genuinely impactful goal, and I find the combination of startup innovation with the stability of the Buhck-Gruppe particularly compelling.

My background is in software engineering, where I have spent over four years building and delivering full-stack web applications. This experience has given me a strong technical understanding of digital platforms, from architecture and API design to user experience and deployment. I understand how platforms connect different stakeholders, which is directly relevant to the digital recycling marketplace you are building.

In my professional experience, I have worked closely with cross-functional teams to translate business needs into technical solutions. I have communicated with stakeholders, gathered requirements, and helped shape product features. This has taught me how to build lasting relationships with partners and customers by understanding their needs and delivering practical solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my technical background, combined with my proactive and independent working style, would allow me to contribute meaningfully to your business development efforts. I have attached my CV for your review and would welcome the opportunity to discuss how I can support easy recycle’s growth.

Sincerely,

Md Shahanur Islam Shagor
