I am writing to apply for the Praktikum Financial Consulting position at Horbach Finanzplanung f˜…r Akademiker in Berlin. Your focus on practical mentoring, strategic client relationships, and real project ownership aligns directly with what I am looking for in my next step.

Currently, I am studying Software Engineering at Voronezh State University. While my academic background is technical, I have always been drawn to the intersection of business strategy, finance, and human relationships. What stands out to me about HORBACH is the emphasis on learning how to advise people strategically and build long-term client relationships rather than just processing numbers.

In my previous work as a web developer, I collaborated closely with clients and stakeholders to understand their needs, communicate solutions clearly, and deliver results on time. These experiences taught me how to listen carefully, ask the right questions, and work proactively toward shared goals. I am comfortable taking initiative and managing my own responsibilities.

I am particularly interested in the opportunity to work on network building and brand awareness for HORBACH in Berlin. I enjoy connecting with people, learning about their goals, and finding ways to create value. I am also eager to take on my own project and contribute meaningfully from day one.

In addition to my technical and analytical background, I communicate effectively across teams and with clients. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international environments. I am looking for a place where I can grow, contribute, and build a strong foundation for my career.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to your team in Berlin.

Sincerely,

Md Shahanur Islam Shagor
