I am writing to apply for the Werkstudent Finance & Unternehmertum position at Horbach Finanzplanung fˆ…r Akademiker in Berlin. As a Software Engineering student at Voronezh State University of Forestry and Technology, I am looking for a practical opportunity where I can contribute meaningfully while continuing my studies. Your focus on strategic customer relationships, brand building, and hands-on project work is exactly the kind of environment where I can grow and deliver.

What stands out to me about HORBACH is the emphasis on real responsibility from day one. The idea of supporting customer advisory processes, building academic networks, and contributing to brand awareness at Berlin universities is something I find genuinely motivating. I am not looking for a passive internship. I want to be involved, take ownership, and learn by doing.

In my previous work as a Web Developer at Explo-IT and DataSoft LTD, I managed client-facing projects, coordinated with stakeholders, and delivered end-to-end solutions. This experience taught me how to communicate clearly with non-technical people, manage expectations, and take initiative without waiting for instructions. I am comfortable working independently and adapting to new challenges quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am currently enrolled as a full-time student and can work up to 20 hours per week with flexibility around exam periods. I am ready to bring my proactive mindset, organizational skills, and willingness to learn to your team. I have attached my CV for your review and look forward to the possibility of contributing to HORBACH Berlin.

Sincerely,

Md Shahanur Islam Shagor
