I am writing to apply for the Software Engineer position at WeSort.AI GmbH. Your focus on building production-ready applications that connect AI models, sensor data, and hardware control in the recycling industry is exactly the kind of challenge I want to work on. The opportunity to contribute to a startup building modern software architecture from the ground up is particularly compelling.

My technical background spans TypeScript, Python, and C++, which directly supports your tech stack requirements. Through hands-on project development, I have built systems that integrate AI models into real-world applications. For example, I developed an AI-powered financial platform using TypeScript, OpenAI APIs, and AWS services, where I designed the backend architecture and implemented real-time data processing pipelines. This experience has given me practical knowledge of how to connect intelligent models with production systems.

One area that particularly interests me is the integration of AI models with hardware and sensor data in industrial environments. In previous work, I built a real-time server monitoring dashboard using Node.js, Socket.IO, and Python that streamed live system metrics to the browser. This required careful attention to low-latency communication, system reliability, and clean architecture. I approach complex systems by analyzing root causes rather than applying temporary fixes, and I prioritize automated testing and clear documentation in every project I deliver.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in TypeScript, Python, C++, and AI integration can contribute to WeSort.AI’s mission of combining technology with circular economy.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
