I am writing to apply for the Lead Generation Manager position at adlicious. Your mission to combine media, creative, and technology through a unique Ad Delivery platform is impressive, and I am drawn to the opportunity to contribute to a growing team in Hamburg.

My background is in software engineering, but I have developed strong analytical and research capabilities through my technical work. I am skilled at conducting structured research, analyzing data, and identifying patterns, which directly supports the lead qualification and market analysis responsibilities outlined in this role.

In my professional experience as a Web Developer, I worked closely with cross-functional teams, contributed to project planning, and supported business development initiatives. I am comfortable managing data, maintaining organized records, and using CRM tools to track progress. I also bring a proactive, self-motivated approach to achieving targets and driving results.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, structured work style, and team-oriented attitude would make me a strong addition to adlicious. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
