I am writing to apply for the Group Accountant and Tax position at IONOS SE. After reviewing the job description, it is clear that this role requires a background in accounting, tax, and financial reporting that I do not possess.

My professional experience is in full-stack web development and software engineering. I have worked with Laravel, Next.js, React, and various backend technologies to build scalable applications. This is fundamentally different from the qualifications required for this accounting role.

I respect the depth of expertise this position demands in IFRS, consolidation, and tax reporting. My skillset is not aligned with these requirements, and I would not want to waste your time with an application that does not match.

I wish you success in finding the right candidate for this position.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
