I am writing to apply for the Area Sales Manager Michigan position at Garage Beer. Your brand's approach of taking the work seriously while keeping things straightforward resonates with how I operate.

My background is in software engineering, where I have spent years building systems that track performance, analyze data, and generate actionable insights. I am comfortable working with technical tools and data sources to identify patterns, segment information, and present findings clearly. This analytical capability aligns with your need for someone who can work with internal and external data to identify business opportunities and tell visual stories.

In previous work, I have collaborated closely with teams to align priorities, set clear goals, and ensure consistent execution. I am comfortable taking ownership of outcomes and working directly with partners to achieve results. I also have experience leading by example and holding myself accountable to the standards I set.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
