I am writing to apply for the Manual QA Tester - Mobile F2P Games position at GameDuell. Your focus on delivering polished, enjoyable player experiences and your long-standing reputation in the cross-platform gaming community make this role particularly interesting to me.

Although my professional background is in full-stack and AI engineering, I have developed a strong quality-oriented mindset through years of building and maintaining production applications. I am experienced in writing and executing test cases, performing regression and smoke testing, and identifying edge cases that affect user experience. I also have hands-on experience with test automation tools like Jest, PHPUnit, and PyTest, which aligns with your interest in improving QA workflows through sensible automation.

In previous development roles, I worked closely with product teams and designers to test new features across web and mobile platforms. I regularly checked build versions, feature flags, and configurations during testing cycles. I documented bugs clearly, reproduced issues systematically, and contributed to smoother release processes. This structured approach to quality assurance has been a consistent part of my workflow.

One area that particularly interests me is testing player journeys in live mobile games. I understand the importance of tutorials, events, offers, and monetization flows in F2P games. My experience building real-time features and user-facing systems gives me a practical perspective on what can go wrong and how to catch issues before they reach players.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to GameDuell’s quality assurance efforts.

Sincerely,

Md Shahanur Islam Shagor
