I am writing to apply for the Meister SHK / Lˆ…ftung / HVAC als Projektkoordinator position at Bodden Lˆ…ftung GmbH. Although my professional background is in software engineering, I bring strong project coordination, team collaboration, and problem-solving skills that are directly transferable to this role.

In my previous work as a Web Developer at Explo-IT and DataSoft LTD., I was responsible for coordinating with cross-functional teams, managing project timelines, and ensuring quality delivery across multiple concurrent projects. I regularly communicated with stakeholders, translated technical requirements into actionable tasks, and maintained clear documentation. These experiences have given me a structured approach to project coordination and a strong sense of accountability.

I am comfortable working independently and in team settings, and I am used to taking ownership of tasks from planning through execution. I am a quick learner and adapt easily to new tools, workflows, and environments. My organizational skills and attention to detail allow me to track progress, identify bottlenecks, and keep projects moving forward.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can contribute to meaningful projects while growing professionally. I would welcome the opportunity to discuss how my coordination skills and work ethic can support your team. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
