I am writing to apply for the Teamleitung Rechnungswesen (m/w/d) position at MARTENS & PRAHL Gruppe. While my professional background is in software engineering, I bring a strong affinity for digital processes and systems, structured problem-solving skills, and experience working collaboratively across teams.

In my previous work as a Web Developer, I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented role-based access control and secure payment gateways. I also deployed and maintained applications on Linux servers using Docker and CI/CD pipelines, ensuring reliable and efficient system operations. This experience has given me a practical understanding of how to optimize digital workflows and manage complex, data-driven processes.

One area that particularly interests me is the opportunity to shape and improve digital processes and systems within the finance team. I have hands-on experience with database management (MySQL, PostgreSQL), server maintenance (Nginx, Apache), and real-time monitoring tools (Prometheus, Grafana). I am comfortable working with structured data, reporting, and ensuring system reliability.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured approach, technical skills, and ability to work collaboratively would allow me to contribute positively to your team. I have attached my CV for your review and look forward to the possibility of discussing how I can support the MARTENS & PRAHL Gruppe.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
