I am writing to apply for the Techniker HLK / HVAC / Lˆ…ftung / TGA position at Bodden Lˆ…ftung GmbH. Your focus on regional projects, a 4-day work week, and a collaborative team environment caught my attention. I am looking to transition into the HVAC and building services field, and I believe my technical background and structured approach to project work would allow me to contribute meaningfully to your team.

Although my professional experience is in software engineering, I have developed strong skills in project coordination, quality control, and documentation. In my previous roles, I regularly supported project leads in delivering complex technical systems, coordinated between development teams and external stakeholders, and maintained detailed documentation throughout the project lifecycle. These responsibilities align closely with the tasks described in your job posting.

I am accustomed to working independently and taking ownership of my work. Whether it was managing API integrations, deploying applications on Linux servers, or troubleshooting production issues, I have always approached tasks with a focus on reliability, structure, and clear communication. I am confident these habits will translate well into the HVAC technical environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my technical discipline, organizational skills, and willingness to learn to Bodden Lˆ…ftung GmbH. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your projects.

Sincerely,

Md Shahanur Islam Shagor
