I am writing to apply for the HR Leiter / Head of RPO position at Impuls HRK. While my professional background is in software engineering rather than HR leadership, I bring a strong understanding of building digital, data-driven systems that can directly support the operational excellence and process digitalization goals of your RPO team.

Through my work as a Web Developer, I have designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication, role-based access control, and secure payment gateways. I have also optimized application performance through query tuning and caching strategies, and delivered real-time features using WebSockets. This experience has given me a practical understanding of how to build efficient, automated, and scalable digital workflows.

One area that particularly interests me is the emphasis on Prozessdigitalisierung at Impuls HRK. I have direct experience deploying and maintaining applications on Linux servers with Nginx, Docker, and CI/CD pipelines, and I have integrated third-party services such as payment gateways and cloud storage. I am comfortable working with modern HR-tech concepts and can contribute to the implementation of AI-gestˆ…tzte Workflows and optimized CRM systems from a technical perspective.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my technical background can support the strategic and operational goals of Impuls RPO.

Sincerely,

Md Shahanur Islam Shagor
