I am writing to apply for the Marketing Working Student (m/f/d) position at inca. Your focus on bringing Agentic AI to insurance claims is a genuinely interesting challenge, and I appreciate the emphasis on real results over AI theatre.

Through my work as a full-stack developer, I have built and shipped complete web applications from concept to deployment. I am fluent in Figma and have used it extensively to design UI mockups, prototypes, and visual assets for multiple projects. I also work comfortably with Tailwind CSS, Bootstrap, and MaterialUI to turn designs into polished, responsive interfaces.

One area that aligns well with this role is my experience owning the full lifecycle of digital products. I have created content for web platforms, written copy for landing pages and dashboards, and managed deployment workflows. I treat AI as a practical tool in my daily workflow, using it to automate repetitive tasks, generate content drafts, and accelerate development cycles.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to inca’s growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
