I am writing to apply for the Schrankdesigner position (Ref.Nr. 4200) at agex IT gmbh. The role's focus on building and maintaining a technical database, analyzing data inconsistencies, and optimizing processes aligns with my experience in structured data management and system improvement.

Through my professional work as a Web Developer, I have built and maintained several internal databases using MySQL and PostgreSQL. I designed schemas, wrote optimized queries, and implemented caching strategies to improve data retrieval performance. I also regularly analyzed data for inconsistencies and collaborated with teams to resolve issues and improve data integrity.

One area that particularly interests me is the optimization of existing processes and structures. In my previous projects, I have worked on streamlining workflows, reducing redundant data entries, and improving the overall reliability of database systems. I enjoy identifying inefficiencies and implementing practical, sustainable solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I am available to start immediately and would welcome the opportunity to discuss how my skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
