I am writing to apply for the Senior Projektmanager position at Die Lobby GmbH. Your agency's focus on delivering tailored digital solutions using open-source technologies like TYPO3, Pimcore, and Shopware aligns with the kind of hands-on, technically informed project management I practice.

In my professional experience as a Web Developer, I have led digital projects from strategy and conception through design, technical implementation, and live deployment. I have worked directly with clients to understand their needs, translated those into actionable project plans, and coordinated with development and design teams to deliver on time and within budget. My technical background allows me to communicate effectively with engineers while keeping the client's business goals in focus.

One area that particularly interests me is managing the full project lifecycle for e-commerce and web development initiatives. I have built and delivered multi-vendor e-commerce platforms, travel booking systems, and AI-powered applications, handling everything from initial client consultation and cost estimation to resource planning, timeline management, and final delivery. I am comfortable creating project calculations, timelines, and proposals while keeping budgets and resources aligned.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical delivery experience can contribute to Die Lobby's client projects.

Sincerely,

Md Shahanur Islam Shagor
