I am writing to apply for the Projektmanager (m/w/d) MSR-Technik & Gebˆudeautomation position at ISG - automation GmbH. Your work in building integrated automation solutions for building, industrial, and marine systems is impressive, and I am interested in contributing to your project delivery team.

Through my professional experience in software engineering and automation, I have developed strong skills in project coordination, technical documentation, and cross-functional communication. I have led end-to-end development of automation systems, from concept design through deployment and quality assurance, which directly relates to managing building automation projects across HOAI phases.

One area that particularly interests me is the development of automation concepts and technical documentation. In my previous work, I created detailed system schematics, functional specifications, and technical reports for complex software systems. I am comfortable working with MSR technology principles and communicating technical requirements clearly to architects, engineers, and clients.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project management and automation experience can support ISG - automation GmbH’s continued success.

Sincerely,

Md Shahanur Islam Shagor
