I am writing to apply for the Projektmanager (m/w/d) MSR-Technik & Gebˆudeautomation position at ISG - automation GmbH. Your focus on developing holistic automation solutions for building, industrial, and marine systems aligns with my experience in building intelligent, real-world technologies that combine software engineering with automation.

Through my professional experience as a Web Developer, I have led the full lifecycle of technical projects, from initial concept and planning through to deployment and quality assurance. I am accustomed to managing multiple work streams, coordinating with stakeholders, and ensuring that technical documentation is clear and complete. These skills translate directly to the project management responsibilities outlined for this role, including the development of automation concepts, creation of technical specifications, and coordination with architects and subcontractors.

One area that particularly interests me is the integration of automation systems with communication protocols and control logic. While my background is in software rather than traditional MSR or GA hardware, I have extensive experience designing and implementing complex, rule-based systems that require precise coordination between components. I am confident in my ability to quickly learn domain-specific protocols such as KNX, BACnet, and Modbus, and apply my systematic approach to building automation projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also willing to travel within northern Germany as required.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical skills can contribute to ISG - automation GmbH’s continued success.

Sincerely,

Md Shahanur Islam Shagor
