I am writing to apply for the Sales Manager (w/m/d) W˜rmepumpe & PV position at Enter by baupal GmbH. Your mission of making homes carbon-free through heat pump and solar installations is both timely and impactful, and I am interested in contributing to a team that is growing in a market with real environmental significance.

While my professional background is in software engineering, the core competencies required for this roleâ structured communication, self-management, and closingâ are ones I have developed and applied consistently. In my work as a Web Developer, I was responsible for leading client consultations, understanding their specific needs, and delivering tailored solutions. I managed my own task pipelines, maintained clear documentation, and followed through on commitments until delivery was complete.

One area that particularly interests me is the emphasis on pre-qualified video consultations. In my previous roles, I regularly conducted remote meetings with stakeholders to gather requirements, present progress, and secure approvals. I am comfortable building rapport through video, listening carefully, and guiding conversations toward clear outcomes without relying on rigid scripts.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in client-facing technical delivery can translate into results for your sales team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
