I am writing to apply for the Performance Marketing Manager Paid Ads position at StraightAds Marketing GmbH. Your focus on data-driven marketing strategies and sustainable growth through clear KPIs aligns with my approach to building systems that deliver measurable results.

While my professional background is in software engineering, I bring strong analytical and data interpretation skills that are directly relevant to performance marketing. I have experience working with databases such as MySQL and PostgreSQL, which has given me a solid foundation in understanding data structures, running queries, and extracting actionable insights from complex datasets. I am comfortable analyzing campaign data, identifying growth opportunities, and making data-backed decisions.

In my previous roles, I have worked independently and taken ownership of projects from planning through execution. I have experience collaborating with cross-functional teams, communicating technical findings clearly to non-technical stakeholders, and ensuring that deliverables meet high quality standards. I am used to working in environments that require structured thinking and attention to detail.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and independent work style can contribute to StraightAds' continued growth.

Sincerely,

Md Shahanur Islam Shagor
