I am writing to apply for the Werkstudent Buchhaltung position at Pollnick Create. Your description of a design and video agency that values clean processes, real numbers, and structured work immediately caught my attention. I am a Software Engineering student who enjoys precise, organized work and taking responsibility for keeping things running smoothly.

What stands out to me about this role is that you are looking for someone who works independently, stays structured even with many individual items, and delivers results on time. These are qualities I have developed through my academic and project work. I have built full-stack applications that required careful tracking of data flows, user inputs, and financial transactions. In one project, I integrated payment systems and subscription plans, which gave me hands-on experience with invoice generation, payment reconciliation, and maintaining accurate financial records within a software system.

Through my previous work as a web developer, I have become comfortable working directly with stakeholders, managing multiple tasks simultaneously, and ensuring that every detail is correct before delivery. I approach my work with the same care for numbers and processes that this role requires. I am confident I can learn your accounting tools quickly and contribute to your finance workflows from day one.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my structured working style and attention to detail can support your agency's financial processes.

Sincerely,

Md Shahanur Islam Shagor
