I am writing to express my interest in the Stellv. Head of HR (m/w/d) position at HR-CONSULTANTS GmbH. While my professional background is in software engineering, I bring a strong analytical mindset, experience in managing complex projects, and a proven ability to work effectively in international and cross-cultural environments.

In my previous roles, I have been responsible for designing and implementing scalable systems, optimizing processes, and ensuring compliance with organizational standards. I have worked closely with diverse teams to drive projects from conception to delivery, always focusing on efficiency, structure, and measurable outcomes. This experience has given me a solid foundation in project management, data analysis, and process improvement.

One area that particularly interests me is the opportunity to contribute to strategic HR projects, particularly those involving HR systems and process optimization. My technical background allows me to approach HR system implementations and data analysis with a structured, analytical perspective, identifying optimization potential and driving change effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
