I am writing to apply for the Social Media, Marketing & Kommunikation Praktikum at Startplatz Kˆ¶ln GmbH. As a Software Engineering student with hands-on experience in web development and AI technologies, I am drawn to the opportunity to contribute to your startup community's digital presence while deepening my skills in content creation and marketing.

What stands out to me about STARTPLATZ is its role as a leading incubator and accelerator in NRW, supporting over 1,500 startups. The chance to work within such an ecosystem, where I can combine my technical background with creative marketing work, is genuinely appealing.

Through my web development experience, I have built responsive landing pages and user interfaces using Next.js, React, and Tailwind CSS. I am comfortable with content management workflows and have worked with tools like Strapi. My experience with AI tools, including OpenAI and Replicate APIs, aligns well with your interest in candidates who use AI technologies and want to explore them further.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to the STARTPLATZ team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
