I am writing to apply for the Project Coordinator position at INFUSE. The role of coordinating between design, development, and marketing teams while managing project timelines and deliverables aligns well with my background in full-stack development and project coordination.

INFUSE's focus on innovation and bringing together people who understand how technology shapes businesses is something I find genuinely interesting. The opportunity to work remotely with a team that values human evaluation in hiring also stands out to me.

Through my professional experience as a Web Developer, I have coordinated website creation and updates from initial requirements through deployment. I have worked directly with designers, developers, and internal stakeholders to ensure projects are delivered on time and meet expectations. Preparing work plans, tracking task lists, and following up on deadlines has been a regular part of my workflow.

One area where I can contribute immediately is coordinating with development teams to support website and digital tasks. I have hands-on experience with the technologies used in web development, which helps me communicate effectively with developers and understand technical requirements. I am also comfortable preparing project documentation, organizing meetings, and ensuring timely distribution of information across team members.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my coordination experience can support INFUSE's projects.

Sincerely,

Md Shahanur Islam Shagor
