I am writing to apply for the Graphic Designer position at Creative Cove Inc. Your focus on in-store graphics, visual merchandising, and packaging design for the beauty industry is clear, and I understand the precision required to maintain brand standards across print and digital assets.

While my background is primarily in software engineering, I have developed a strong sense of visual design through years of building user interfaces. Working with tools like Figma, Tailwind CSS, and MaterialUI has given me practical experience with layout, typography, color theory, and creating consistent visual systems. I am comfortable preparing files for print and digital release, managing image manipulations, and ensuring brand consistency across different formats.

In my previous work as a Web Developer, I regularly collaborated with design teams to translate visual concepts into responsive, production-ready interfaces. This required reviewing layouts, adjusting spacing and fonts, and maintaining design integrity across multiple screen sizes and configurations. I am accustomed to working within templated systems and managing multiple versions of assets simultaneously.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

OVERTURE

Sincerely,

Md Shahanur Islam Shagor
