I am writing to apply for the Service Planner Guwahati position at Rentokil Initial. The role's focus on end-to-end service planning, data accuracy, and cross-functional coordination aligns with my background in software engineering and operational support.

What stands out to me about this opportunity is the emphasis on system usage, digital transition, and data-driven service delivery. My experience working with IT systems, maintaining accurate records, and supporting digital tool adoption has prepared me to contribute meaningfully to these responsibilities.

In previous work, I coordinated with multiple teams to ensure smooth workflows, tracked productivity metrics, and maintained error-free documentation. These experiences have strengthened my ability to plan schedules, monitor KPIs, and communicate effectively across departments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
