I am writing to apply for the Human Resources Assistant position at Recruit Lytics Hires. Your commitment to fostering a professional and employee-focused workplace aligns with my own approach to work, where clear communication, organization, and supporting team success are priorities.

Although my professional background is in software engineering, I have developed strong organizational and administrative skills through managing complex projects, coordinating with multiple stakeholders, and maintaining detailed documentation. I am accustomed to handling sensitive information with discretion and ensuring accuracy in every task I complete.

In my previous role as a Web Developer, I was responsible for maintaining project records, tracking progress across teams, and preparing reports for stakeholders. These responsibilities required careful attention to detail, the ability to multitask, and consistent follow-through on commitments. I am confident these skills transfer directly to supporting HR operations, including recruitment coordination, employee record management, and compliance documentation.

In addition to my organizational experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your HR team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
