I am writing to apply for the Entry Level Administrative Assistant position at Recruit Lytics Hires. The opportunity to support remote operations through organized data management and task coordination aligns well with my background in structured workflows and digital systems.

Through my work as a software engineer, I have developed strong organizational habits and attention to detail. I regularly maintain records, update documentation, and track tasks to ensure nothing falls through the cracks. These skills transfer naturally to administrative support, where accuracy and consistency are essential.

I am comfortable using spreadsheets and digital tools to organize information and keep it accessible. In previous roles, I managed data entry, updated trackers, and coordinated with team members to maintain structured workflows. I follow instructions carefully and flag inconsistencies when I see them.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to your team.
