I am writing to apply for the Digital Marketing Designer role at Format. Your work in providing e-commerce solutions for photographers is interesting, and I appreciate the focus on building a collaborative, remote-first team culture.

My background combines design sensibility with technical implementation. I have hands-on experience with Figma for UI design and prototyping, and I understand how to create assets that are both visually consistent and technically sound. I am comfortable working with design systems and maintaining brand guidelines across multiple channels.

One area where I can contribute directly is in creating web-based marketing assets. I have strong HTML and CSS skills, which means I can design email templates, landing pages, and website components that render correctly across devices and platforms. I also have experience with Tailwind CSS and Bootstrap for rapid, responsive UI development.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my design and development skills can support the Format team.

Sincerely,

Md Shahanur Islam Shagor
