I am writing to apply for the Gruppenleiter Rechnungswesen & Jahresabschluss position at Kamberi Group Holding GmbH. While my professional background is in software engineering, I bring a strong analytical mindset and experience building data-driven systems that could support the financial operations of your diverse group of companies.

In my previous work as a full-stack developer, I have designed and maintained systems that handle complex data flows, user permissions, and reporting. I built a multi-vendor e-commerce ecosystem using Laravel and MySQL that required careful management of financial transactions, role-based access, and inter-entity coordination. This experience has given me a structured approach to data integrity and process consistency across multiple operational units.

One area that particularly interests me is the opportunity to help unify and streamline financial processes across the Kamberi Group's dozen companies. My technical background in database optimization, reporting, and workflow automation could contribute to improving the efficiency of intercompany account reconciliation, monthly reporting, and liquidity management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
