I am writing to apply for the Vermessungsingenieur/Vermessungstechniker position at OST BAU. Your company's focus on infrastructure and construction projects in Oebisfelde-Weferlingen is impressive, and I am interested in contributing to your team's surveying operations.

Through my work as a software engineer, I have developed strong analytical and technical skills that are relevant to modern surveying tasks. I am experienced with database management systems like MySQL and PostgreSQL, which are essential for organizing and analyzing survey data. My background in data analysis and documentation preparation supports the creation of accurate inventory records and billing documents.

In previous roles, I have worked extensively with data processing and analysis tools, ensuring precision and reliability in all outputs. I am comfortable working both independently and as part of a team, and I am eager to apply my technical mindset to the practical challenges of surveying and measurement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to OST BAU's surveying projects. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
