I am writing to apply for the Account Executive (m/w/d) â B2B SaaS / Enterprise role at Omnora GmbH. Your focus on knowledge and intelligence management in the enterprise space is a domain I find genuinely compelling, and I appreciate the emphasis on real business impact over activity metrics.

My background is in full-stack software engineering, but I have consistently operated at the intersection of technology and business. In my previous role as a Web Developer at Explo-IT, I was responsible for managing client relationships from initial discovery through project delivery. I regularly led conversations with business owners and stakeholders, identified their operational pain points, and translated those into clear technical roadmaps. This required strong communication, active listening, and the ability to present complex solutions in terms of ROI and business value.

What stands out to me about Omnora is the structured approach to sales and the emphasis on frameworks like MEDDIC and Challenger. I am naturally data-oriented and have always worked with clear KPIs, whether optimizing application performance or tracking project milestones. I am eager to apply this same structured thinking to enterprise sales cycles, from pipeline management to deal closure.

In addition to my technical and client-facing experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in B2B client engagement and solution-oriented communication can contribute to Omnora’s growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
