I am writing to apply for the Projektingenieur position in the water management and drainage applications department at Kokenschmidt GmbH. Your focus on environmental technology and structured project handling aligns with my approach to delivering reliable, independently managed work.

Through my professional experience in software engineering, I have developed strong project management and coordination skills. I have independently handled complex projects from initial planning through to delivery, working directly with stakeholders to align requirements, coordinate with relevant parties, and ensure timely completion. This structured, self-reliant working style matches the responsibilities outlined for this role.

One area that particularly interests me is the independent processing of permit applications and coordination with authorities and clients. In my previous roles, I regularly managed communication between technical teams, clients, and external partners, ensuring that all parties remained aligned throughout the project lifecycle. I am comfortable taking ownership of tasks and seeing them through to completion with minimal supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and coordination skills can contribute to Kokenschmidt GmbH’s water management projects.

Sincerely,

Md Shahanur Islam Shagor
