I am writing to apply for the Working Student (f/m/d) - IT Infrastructure position at Instagrid. Your mission to replace combustion generators with clean, portable power solutions is both technically ambitious and environmentally meaningful. I would welcome the chance to support your IT team while learning more about a fully cloud-based Microsoft 365 environment.

Through my professional experience as a Web Developer, I have developed strong skills in Linux server administration, Docker containerization, Nginx configuration, and CI/CD pipeline management. I am comfortable working with both Windows and macOS endpoints, troubleshooting hardware and software issues, and maintaining clear documentation. My background in deploying and maintaining production systems has given me a structured, service-oriented approach to IT support.

One area that particularly interests me is the hands-on aspect of this role. I enjoy being the first point of contact for technical questions, setting up devices for new colleagues, and resolving incidents methodically. In my previous roles, I regularly handled user account setup, software deployment, and system maintenance tasks that align closely with the responsibilities described for this position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would be glad to discuss how my skills can contribute to Instagrid’s IT operations. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
