I am writing to apply for the IT-Teamleiter (m/w/d) - KI & Digitale Prozesse position at Rabe Holding GmbH & Co. KG. Your focus on building a solid technical foundation for online education and financial training, combined with a clear need for structured processes and AI integration, aligns directly with the kind of work I find most meaningful.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel and Next.js, integrated RESTful APIs, and deployed systems on Linux servers with Docker and CI/CD pipelines. I have also worked with AI tools and automation, including building AI-powered assistants using OpenAI's API and integrating image processing via Replicate API. This combination of web development and AI experience allows me to understand both the technical infrastructure needed for live events and automated marketing workflows, and where AI can add real value.

One area that particularly interests me is building processes that reduce dependency on individuals and make teams more resilient. In previous work, I have focused on creating clean documentation, structuring workflows, and ensuring that knowledge is shared rather than siloed. I approach process work with the same care as technical architecture, because both determine whether a system scales or breaks under pressure.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
