I am writing to apply for the Vertriebsingenieur (Angebotskalkulation) position at CBRE Global Workplace Solutions. Your company's role as a global leader in integrated facility and project management, serving clients across more than 100 countries, is impressive. I am particularly interested in contributing to your team in Frankfurt am Main.

My professional background is in software engineering, where I have spent over four years building full-stack web applications and managing end-to-end project delivery. Through this work, I have developed strong analytical skills, a structured approach to problem-solving, and the ability to translate complex requirements into actionable plans. These competencies align well with the responsibilities of analyzing customer requirements and developing reliable cost calculations.

In my previous role as a Web Developer at Explo-IT, I regularly acted as a bridge between technical feasibility and business requirements. I collaborated with internal teams, managed stakeholder expectations, and ensured that every solution was both technically sound and commercially viable. This experience directly maps to the active interface function described in your job posting, where technical feasibility, commercial evaluation, and customer requirements must be balanced.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, structured work style, and experience in coordinating complex processes would allow me to contribute meaningfully to your Angebotskalkulation team. I have attached my CV for your review and look forward to the opportunity to discuss how I can support CBRE Global Workplace Solutions.

Sincerely,

Md Shahanur Islam Shagor
