I am writing to apply for the Founders Associate / Marketing & Growth role at FORT˜ A´fi. Your mission to build a leading digital consumer-health brand in the healthy aging space is compelling, and I appreciate the focus on combining medical credibility with digital innovation.

Through hands-on project development, I have built and optimized full-stack web platforms that required a strong understanding of user experience, conversion flows, and data-driven decision making. I have worked on landing pages, subscription models, and analytics integration, which aligns well with the marketing and growth responsibilities of this role.

One area that particularly interests me is optimizing the customer journey. In previous work, I developed a multi-vendor e-commerce ecosystem that involved role-based access, payment flows, and retention features. This required analyzing user behavior, improving conversion paths, and coordinating across different stakeholder groups.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to contribute to FORT˜ A´fi's growth and learn directly from experienced founders. I have attached my CV for your review and look forward to the possibility of discussing how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
