I am writing to express my interest in the Software Engineering position in Germany. With a strong foundation in full-stack development and a growing focus on autonomous systems and AI, I am well positioned to contribute to engineering teams working on modern, scalable applications.

My professional experience spans over four years of web and full-stack development. I have worked extensively with Laravel and Next.js to build production-grade applications, including multi-vendor e-commerce platforms, real-time dashboards, and AI-powered financial tools. On the backend, I design RESTful APIs with Node.js and Express, manage relational databases like MySQL and PostgreSQL, and implement secure authentication, role-based access control, and payment gateway integrations.

On the frontend, I build responsive, SEO-friendly interfaces using React, Next.js, TypeScript, and Tailwind CSS. I have delivered real-time features using WebSockets and Socket.IO, and deployed applications on Linux servers with Docker, Nginx, and CI/CD pipelines. My work at Explo-IT involved optimizing Eloquent queries, implementing caching strategies, and integrating third-party services such as cloud storage and social logins.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills and experience align with your team’s needs.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
