I am writing to apply for the Projektingenieur / Projektleiter TGA / HKLS position at Riverstate Premium Recruiting. While my professional background is in software engineering rather than building services engineering, I bring strong project management, technical documentation, and system integration capabilities that are directly transferable to this role.

Through my experience delivering full-stack web applications, I have developed a disciplined approach to project planning, cost estimation, and timeline management. I am comfortable preparing technical documentation, coordinating with multiple stakeholders, and ensuring that project milestones are met on schedule. These skills align well with the responsibilities of independent technical planning and project leadership in the TGA domain.

One area that particularly interests me is the opportunity to work on complex, large-scale projects for municipal clients. I have experience managing end-to-end delivery cycles, including requirement analysis, resource coordination, progress tracking, and final reporting. I am confident in my ability to apply these project management fundamentals to TGA projects such as leisure pools, spas, and ice sports facilities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management and technical background can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
